DOWNGRADING COMMITTEE 1 Apr 46
During the entire month of January the regiment was committed as Infantry in the VI Corps sector of northern Alsace. On the morning of 1 January the regiment was placed on a two-hour alert and shortly thereafter orders were received to relieve the 179th Infantry Regiment in position north of Wissembourg. Relief was completed without incident at 2045 hours 1 January, and the regimental CP was established at Weiler. The companies occupied and continued to improve the Maginot line as MLR. The Rear Detachment left Hatten on 2 January with all engineering equipment to establish a rear area in St. Michel.

The regimental CP was moved to Lampertsloch on 3 January. Patrols were initiated well forward of our MLR and into the towns of Wingen, Lambach, and Climbach during the period 1 - 13 January and accounted for six enemy killed, thirteen wounded and five taken prisoner.

On 13 January the regiment changed position relieving the 2nd and 3rd battalions of the 275th Infantry Regiment. Regimental CP was opened at Zinswiler.

At 0800 hours 14 January a combat patrol supported by two medium tanks moved out on the town of Rehbach. Enemy was encountered in dug in positions southwest of the town and was engaged with fire from the tanks and the patrol. Heavy enemy mortar and artillery fire was brought on the patrol forcing it to withdraw. At 1230 hours the same day the patrol again moved out and routed the enemy from its positions southwest of Rehbach killing one and wounding several others as they ran off. The action of this patrol enabled our positions on the left flank to be moved forward thus strengthening our entire line.

During the period 15 - 20 January our patrols continued to maintain contact with the enemy and harass them with small arms, mortar, and artillery fire. Our positions were strengthened several times by forcing the enemy to yield ground.

On 21 January our sector was widened and 3rd battalion moved into new positions and immediately made contact on both flanks and commenced construction of fortification and defenses on new positions. Regimental CP was moved to a more central location and opened in vicinity of Lichtenberg.

From 22 to 27 January our patrols made little contact with the enemy but enemy movements and positions were clearly observed and continually harassed with mortar and artillery fire. Three enemy were killed, ten wounded, and three taken prisoner. 1st battalion of 179th Infantry Regiment was attached to the regiment on 25 January.
For the remained of the month our patrols continued active but failed to make contact with the enemy. Patrols reported that unoccupied positions and abandoned material indicated withdrawal by the enemy.

5. OUR OPERATIONS FOR THE PERIOD:

Extensive night and early morning patrolling were carried out during the period for the purpose of locating the eny and taking a PW. There was a continuation of harassing the eny with arty and mortar fire. The Charley patrol reported in at 0550 A with following information: Out at 0330 A going in NE direction. Encountered and made brief examination of a mine vic 833372. It was similar to our trip flare, M49 and was nailed to a tree. Trip wire was American type and was hung 2' above ground for approx 30' running from tree. The patrol continued on investigating old posts along route and found them unoccupied. The turned NW vic 834374 and went to 831-377. A cough was heard from vic 829378 after which, they turned S from 831-377 and came in.

At 0015 A Blue patrol departed again from 815371. Proceeded in a N direction to 817380. Dispersed patrol in ambush around draw in vic 817381. The patrol heard personnel off to the N of their posn but nothing materialized. They remained in their posns until 0550 A and returned to our lines at 0550 A (see overlay for route taken).

White patrol reported in 0540 A with following info: Patrol out at 0150 A, departing from 831362, heading in a NE direction. Encountered the Div Recon patrol a short ways and oriented them. At 838366 the patrol found 6 American AP mines. The mines were not leyed or activated. They continued on checking old posn in vic 839369. From there proceeded to 839373 and noticed trails from 838372 to 840369 and 839373 to 841374 were well used by personnel. The patrol arrived vic 839373 at approx 0450 A and waited there and fired their flare at 0500 A. After which, they returned to our lines at 0540 A. While waiting to fire flares, tracked vehicles movement were heard coming from general direction west of OBERnhthal.
